ABOUT THE PROGRAM

This is a pilot program bringing resources to private landowners to plan and implement critical wildfire resilience and forest health projects on their properties.

TYPES OF ASSISTANCE

The program provides technical assistance and funding for various types of work including developing a Forest Management Plan, CEQA environmental compliance preparation, and/or implementing a project.

PROPERTY ELIGIBILITY REQUIREMENTS

The land must be between 3 acres and 5,000 acres of private, non-industrial forestland.

APPLICATION PROCESS

This is a competitive application process where only the strongest applicants will be awarded funding. Applications are reviewed by a committee of regional forestry professionals.
